Method

1. Weigh out phase A in separate vessel and mix ingredients individually to form a solution.
2. Weigh out phase B in main powder mixing vessel and add solution from phase A very slowly in stages with mixing (compound mixing). Ensure all liquid has been absorbed by powder and fine powder achieved with no lumps.
3. Add phase C very slowly in stages with mixing (compound mixing). Ensure all liquid has been absorbed by powder and fine powder achieved with no lumps.
