Method

1. Weigh out phase A and start heating to 75°C. Ensure all materials are completely melted and mix until uniform.
2. At temperature, add phase B and mix until uniform.
3. At temperature add phase C and homogenise until completely smooth and uniform. Bulk will thicken.
4. Once homogenised, add phase D individually and mix between additions.
5. Below 40°C, add phase E to the batch and mix until thoroughly combined.
6. Add phase F individually and mix well until combined.
7. Prepare into moulds and refrigerate for minimum 2 hours.
8. Unmould the scrub bar(s) and leave to dry/ solidify for at least 3 days.
