Method

1. Add phase B materials into the main batch individually and mix until completely dissolved.
2. Add phase C materials into the main batch individually, with good mixing between additions.
3. Adjust pH to 7.00.
4. Allow bulk to completely de-aerate. Spread a thin even layer onto the paper using a suitable brush. Apply both sides.
5. Hang the paper and allow to fully dry before use.
6. In a separate vessel combine phase D until uniform and then add to main batch. Mix until uniform colour.
7. Weigh out phase A and add powder slowly with vortex mixing until dispersed.
