Preparation procedure

1. Weigh out Phase A and add powder slowly with vortex mixing until dispersed.
2. Add Phase B materials into the main batch individually and mix until completely dissolved.
3. Add Phase C materials into the main batch individually, with good mixing between additions.
4. In a separate vessel combine Phase D until uniform and then add to main bath. Mix until uniform colour.
5. Adjust pH to 7.00.
6. Allow bulk to completely de-aerate. Spread a thin even layer onto the paper using a suitable brush. Apply both sides.
7. Hang the paper and allow to fully dry before use.
